

Applications are invited for the following full-time positions in the Saw Swee Hock School of Public Health:

**Research Associate in Infectious Disease Epidemiology
(National University of Singapore)**

The Saw Swee Hock School of Public Health (SSHSPH) at the National University of Singapore (NUS) is recruiting a full-time Research Associate to work on research related to antimicrobial resistance (AMR). The successful candidate will be part of a cross-institutional AMR centre and will work on projects related to the epidemiology and control of AMR and public and stakeholder perceptions of antibiotic resistance. Specific responsibilities will be to: contribute to the design of surveys and other studies related to AMR; prepare documents and study materials for institutional review board applications; conduct literature reviews; contribute to data collection and fieldwork for AMR-related studies; conduct analyses of epidemiological datasets; contribute to writing of research papers for publication. The ideal candidate should possess a Master's degree in Public Health or a related subject, and have experience conducting interviews in person and searching and critically appraising scientific literature. Strong quantitative skills and experience analysing complex health-related datasets using Stata, R or similar statistical software is highly desirable. Good writing and interpersonal skills and fluency in English are essential, as are good organizational skills and the ability to work to tight deadlines. The position will be funded for an initial period of 12 months and could be extended.

The Saw Swee Hock School of Public Health is based in one of Asia's leading universities. Situated in the most liveable city in Asia, NUS is a vibrant English-speaking, research-intensive university ranked among the top in the world. SSHSPH is the newest of 16 schools within NUS, building on over 60 years of experience in research, teaching and practice as well as international collaborations with the London School of Hygiene and Tropical Medicine, the Karolinska Institute, Harvard School of Public Health and the University of Michigan School of Public Health.

Recruitment is open immediately, and will continue until the position is filled. Applicants should send a brief statement of interest, CV, three named references, [NUS Personal Data Consent for Job Applicants](#) and other supporting documents to:
