

## **Assistant Professor/Associate Professor/Professor (Health Economist)** **Saw Swee Hock School of Public Health, National University of Singapore**

The National University of Singapore – which is the top ranked university in Asia – is recruiting full-time faculty staff for the Saw Swee Hock School of Public Health (SSHSPH). The positions are tenure, research and practice appointments. In addition to an attractive salary and benefits package, new faculty members may be eligible for a start-up grant to initiate their independent stream of research and subsidised university accommodation.

Researchers active in one or more of the following areas are particularly encouraged to apply:

- Economic evaluation of medical technology and/or public health interventions;
- Comparative effectiveness analysis including systematic review, meta-analysis, and analysis of real-world evidence;
- Health technology assessment for improving the design and capacity of public health systems and health care systems in resource allocation or priority setting;
- Economic theories to support healthcare resource allocation or priority setting.

### **Requirements:**

- a) Recognized Doctoral degree in a relevant discipline with strong post-doctoral research records;
- b) Track record of publishing in high-impact international peer-reviewed journals;
- c) Experienced in leading independent research studies or a component within larger research programs;
- d) Ability to generate and maintain an independent stream of research funding;
- e) Ability to teach public health courses at both undergraduate and graduate levels;
- f) Ability to work in multidisciplinary teams;
- g) Ability to work with culturally diverse populations.

### **Responsibilities:**

Responsibilities include:

- establishing an independent research agenda through extramural funding;
- developing collaborative, multidisciplinary research;
- curricula design and teaching;
- graduate student advising,
- and contributing to policy/community development in the field of public health.

To apply, please submit a cover letter specifying your research and/or teaching interests and experience, your curriculum vitae, names and contact details of 3 references, and the [NUS Personal Data Consent for Job Applicants](#) by **2 February 2019** to:

### **About the Saw Swee Hock School of Public Health**

The Saw Swee Hock School of Public Health is the newest of 16 schools/ faculties within the National University of Singapore (NUS). Founded in 1905, NUS is the largest and most respected university in the nation. NUS is a leading global university centered in Asia, offering a global approach to education and research, with a focus on Asian perspectives and expertise. It is an innovative, research-intensive university with over 36,000 students from 100 countries.

The Saw Swee Hock School of Public Health (SSHSPH) builds upon over 60 years of experience in research, teaching and practice formerly as a department and since 6 years as an independent school. With a focus on the health of Asian populations, the School highlights:

- Identifying, developing and testing innovative solutions that integrate different research discoveries into potential public health actions;
- Collecting, collating and integrating data and evidence to inform public health policies;
- Implementing a broad-based curriculum that focuses upon the multidisciplinary nature of public health problems and solutions.

The School actively collaborates with many partners including the London School of Hygiene and Tropical Medicine, Karolinska Institutet, Harvard T.H. Chan School of Public Health and University of Michigan School of Public Health.

At the postgraduate level, the School's flagship program leads to the Master of Public Health (MPH) degree. The MPH Program attracts students from a wide range of disciplines from within Singapore and throughout the region.

### **About Singapore**

Singapore is an island republic in South-East Asia, situated between the countries of Malaysia and Indonesia. Located at one of the crossroads of the world, Singapore's strategic position has helped it grow into a major centre for trade, communications and tourism. It is also a thriving hub for biomedical sciences in Asia. Singapore offers an established research infrastructure, a vibrant research climate and strong financial support for R&D.

With English as the language of administration, business, and technology, foreign professionals find it easy to work and live in Singapore. In addition, the city offers a safe environment, low personal taxation and quality standard of living. In fact, Singapore has been ranked as the most livable city in Asia (ranked 25<sup>th</sup> in the latest MERCER survey).

Foreigners form a significant percentage of the city-state's total employment pool, contributing to the city's industries as well as enriching her cultural offerings. Singapore is a cosmopolitan, multi-ethnic, multi-religious and multi-lingual society.
